Dynamically created Anti-Levman manoeuvres by anti-critical white moves and by the white King moves which self-pin the white Sf4 from 2 different directions. The latter Antziel element is compensated through self-unpinning. AB/BA blacks move. Thanks to the author for this exhaustively comments. A clear winner!

I like the first move from white 1-Ld1! and 1-Te4! Which make it possible for black Bishop and Rook to sacrifice on e2 and d4. Very originell!
